ABOUT ME

Software Engineer and B.Tech Information Technology student with experience in full-stack development and applied AI. Focused on building reliable, user-friendly software and writing clean, maintainable code.

EDUCATION

Vidyalankar Institute of Technology

Mumbai, India

Bachelor of Technology in Information Technology (CGPA: 9.14/10)

2023 – Present

St.Xaviers High School & Jr.College

Navi-Mumbai, Maharashtra

Higher Secondary Certificate (HSC) – 81.33% (CET) – 95.14%

2021 – 2023

EXPERIENCE

Sprite Genix

December 2025 – March 2026

Full Stack Developer (Project-Based)

Remote

- Contributed as a full-stack developer on SimpliCV, an AI-powered resume builder built with Next.js, Prisma, and PostgreSQL.
- Integrated **20+ resume templates**, built a live resume customization panel, and implemented AI-powered auto-fill using Google Gemini/OpenAI APIs.

LEADERSHIP & VOLUNTEERING

Google Developer Groups - VIT

September 2025 – May 2026

Technical Lead

- Led technical initiatives and collaborated with the core team to organize developer-focused events and workshops.
- Developed hands-on project demonstrations and technical content for workshops, enabling practical learning experiences for participants.

PROJECTS

Floentry – Multi-Warehouse Inventory Management Platform | *TypeScript, NestJS, GraphQL, PostgreSQL*

- Built a multi-warehouse inventory platform using Next.js, NestJS, GraphQL and PostgreSQL supporting procurement, inventory, sales and billing across 22 business modules.
- Implemented FEFO inventory tracking, role-based multi-tenancy, GraphQL subscriptions, WebSockets and Razorpay integration.

Distillation vs. SFT for Chest X-ray Report Generation | *Qwen3.5-2B, MedGemma-27B, LoRA, vLLM, Modal*

- Compared chain-of-thought distillation (MedGemma-27B teacher) with LoRA SFT for a Qwen3.5-2B report generator on 10K MIMIC-CXR studies, using matched setups and paired bootstrap tests.
- Built the vLLM/Modal teacher-generation pipeline and a multi-metric evaluation suite (CheXbert, RadGraph, GREEN, RaTEScore).
- Found SFT beat distillation on key clinical metrics (CheXbert micro-F1 0.504 vs. 0.471) at about one-fifth of the cost.

VentureVista – AI-Powered Location Feasibility Analyzer | *FastAPI, React, PostgreSQL, Gemini API*

- Built an AI-powered feasibility platform using FastAPI and React with Google Places integration and Haversine-based POI deduplication.
- Implemented LLM-powered location scoring and automated report generation, with a Gemini-to-Ollama fallback for reliability.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java

Frameworks: Next.js, React, NestJS, Node.js, FastAPI

APIs & Data: REST, GraphQL, WebSockets, PostgreSQL

AI/ML: PyTorch, LoRA/PEFT, vLLM, LLM evaluation

Tools: Docker, AWS (EC2, S3), Git
