ABOUT ME

Driven by curiosity and a desire to solve real-world problems, I enjoy transforming ideas into scalable and user-focused software solutions. I continuously explore modern technologies, embrace challenging engineering problems, and strive to build applications that are reliable, efficient, and impactful.

EDUCATION

Vidyalankar Institute of Technology

Mumbai, India

Bachelor of Technology in Information Technology (CGPA: 9.14/10)

2023 – Present

St.Xaviers High School & Jr.College

Navi-Mumbai, Maharashtra

Higher Secondary Certificate (HSC) – 81.33% (CET) – 95.14%

2021 – 2023

EXPERIENCE

Sprite Genix

December 2025 – March 2026

Full Stack Developer (Project-Based)

Remote

- Contributed as a full-stack developer on SimpliCV, an AI-powered resume builder built with Next.js, Prisma, and PostgreSQL.
- Integrated **20+ resume templates**, built a live resume customization panel, and implemented AI-powered auto-fill using Google Gemini/OpenAI APIs.

LEADERSHIP & VOLUNTEERING

Google Developer Groups - VIT

September 2025 – May 2026

Technical Lead

- Led technical initiatives and collaborated with the core team to organize developer-focused events and workshops.
- Developed hands-on project demonstrations and technical content for workshops, enabling practical learning experiences for participants.

PROJECTS

Floentry – Multi-Warehouse Inventory Management Platform

NestJS, GraphQL, Supabase, Next.js

- Built a multi-warehouse inventory platform using Next.js, NestJS, GraphQL and PostgreSQL supporting procurement, inventory, sales and billing across 22 business modules.
- Implemented FEFO inventory tracking, role-based multi-tenancy, GraphQL subscriptions, WebSockets and Razorpay integration.

Medical Model Distillation – On-Device Chest X-ray Report Generation (*Ongoing*)

MedGemma-27B, Qwen-VL-2B, vLLM, Modal

- Developing a knowledge-distillation pipeline to transfer capabilities from the 27B MedGemma medical vision model to the 2B Qwen-VL model for on-device chest X-ray report generation.
- Building the data and teacher-labeling pipeline on Modal using vLLM, including MIMIC-CXR image-report cleaning, batched inference, and resumable GPU-efficient runs.

VentureVista – AI-Powered Location Feasibility Analyzer | *FastAPI, React, PostgreSQL, Gemini API*

- Built an AI-powered feasibility platform using FastAPI and React with Google Places integration, Haversine-based POI deduplication, LLM-powered scoring, automated report generation, and Gemini-to-Ollama fallback.

TECHNICAL SKILLS

Languages: Java (Primary), JavaScript, Python

Frameworks: Next.js, React.js, NestJS, Node.js

APIs: REST, GraphQL

Database: PostgreSQL

Cloud & DevOps: AWS (EC2, S3), Docker, Git, GitHub, Postman

AI/ML: Machine Learning, Generative AI, LLMs
