About Me

I'm a full-stack developer who loves building the engine behind great digital experiences. With expertise in Node.js, Python, and cloud-native backend design, I create APIs and data systems that are fast, secure, and built to scale. Paired with solid front-end capability, I bring the full product lifecycle together—delivering seamless, polished, and performance-driven applications.

Education.

Vidyalankar Institute Of Technology

B.Tech in Information Technology (GPA: 9.45/10)

Mumbai, India

2023 – Present

St.Xaviers High School & Jr.College

Nerul,Navi-Mumbai,
India

Grade XII 81.33%

2021 – 2023

Projects

Floventory (Inventory Management System) | React, TypeScript, Shadcn UI, Tailwind CSS, Node.js, PostgreSQL, Prisma, Clerk | [Live Link](#) | [Repo](#)

- Built a full-stack inventory management platform enabling organizations to manage warehouses, products, suppliers, and stock levels with role-based access. Designed a **collaborative file management workflow** with client-side decryption and editing.
- Designed scalable backend APIs using Node.js, Prisma, and PostgreSQL, ensuring data consistency for inventory tracking, stock movements, and analytics.
- Implemented modern UI using Shadcn and Tailwind with dashboards, filters, pagination, and real-time status indicators for efficient warehouse operations.

SpendSplit (Expense Splitting Application) | React, TypeScript, Node.js, Express, PostgreSQL | [Live Link](#) | [Repo](#)

- Developed a group expense management application allowing users to split bills, track balances, and settle expenses seamlessly.
- Implemented secure authentication and group-based expense tracking with real-time balance calculations and settlement summaries.
- Designed an intuitive frontend with dynamic charts and transaction history to improve financial transparency among group members.

SimpliCV (Resume Builder & Management Platform) | Next.js, TypeScript, Prisma, PostgreSQL, Tailwind CSS | [Live Link](#) | [Repo](#)

- Built a resume creation and management platform enabling users to design, edit, and store professional resumes with customizable templates.
- Implemented backend services for resume versioning, structured data storage, and secure updates using Prisma ORM and PostgreSQL

- Focused on clean architecture and performance optimization, ensuring fast rendering and a smooth user experience across devices.

Experience

Full Stack Developer Intern

December 2025 – March 2026

Sprite Genix Services LTD.

Mumbai, Maharashtra, India (Remote)

- Designed and developed a scalable resume management platform enabling users to create, edit, and manage multiple resume versions with structured data handling.
- Engineered RESTful backend APIs to handle resume CRUD operations, user profiles, and secure data persistence using Prisma and PostgreSQL
- Implemented secure authentication and authorization workflows, ensuring controlled access to user resumes and account data.
- Delivered production-ready, clean, and maintainable code with a modern, responsive UI focused on performance, usability, and cross-device compatibility.

Technical Lead

September 2025 – Present

Google Developer Groups

Mumbai, Maharashtra, India (Hybrid)

- Led and managed open source software projects within the Google Developers Group community, driving collaboration and innovation across diverse contributors to achieve project goals and deliver quality code .
- Facilitated technical discussions, mentorship, and community engagement, fostering knowledge sharing and effective communication among developers, enhancing team productivity and open source contributions.
- Coordinated diverse teams to plan and deliver technical workshops, ensuring seamless collaboration and successful event execution. Managed resources, schedules, and communication to enhance participant learning and engagement..

Technical Skills

Languages: JavaScript, TypeScript, Python, Java

Frameworks/Libraries: Python, React, Next.js, Tailwind CSS, Nest.js, Express.js, Apollo Client, TanstackQuery, GraphQL, Jest , Redis,

Documentation: Swagger , CompoDoc

Databases: MongoDB, Prisma, PostgreSQL, TypeORM

Developer Tools: Git, VS Code, Postman
